Divitem Whitepaper

"The People's Crypto"

1. Introduction

Divitem is a next-generation decentralized cryptocurrency engineered from the ground up to serve the people. It is not a fork of any existing chain. Instead, Divitem was purpose-built to prioritize fairness, transparency, and long-term sustainability for validators, miners, and users alike. In a time when trust in centralized systems continues to erode, Divitem offers a new path forward: a blockchain secured by innovation and integrity.

Claim: Divitem is the most secure cryptocurrency in existence, combining AI fraud detection, validator reputation, ZKP, and Sybil resistance in a unified architecture.

2. Problem & Solution

Problems in Crypto Today:

- Centralized control and hidden manipulation

- Limited validator access (staking monopolies)

- Rampant fraud and spam transactions

- Lack of community-first economic models

Divitem Solutions:

- Custom Proof of Stake with VRF & Reputation

- AI Fraud Detection (E.L.I.A.)

- Global Infrastructure with synced nodes

- CLI Wallet Distribution

3. Technology Overview

- Proof of Stake + VRF

- E.L.I.A. AI Fraud Detection

- Zero-Knowledge Proofs (ZKP)

- Validator Reputation System

- Global Node Syncing

4. Tokenomics

- Token: Divitem (DVM)

- Max Supply: 14,000,000,000 DVM

- Mining Rewards: PoS + community mining

- Inflation: Fixed per block, dynamic staking rewards

Reward Breakdown:

- Validator Rewards (stake-based)

- Genesis Bonus: 100 early miners

- Community Bounties

5. Validator System

- Stake DVM

- Submit wallet + key

- Pass fraud and ZKP checks

Rotation: VRF

Reputation: Uptime, honesty, contributions

6. Security Architecture

- E.L.I.A. (AI fraud detection)

- ZKP-enabled transactions

- Sybil & bribery resistance

7. Team & Vision

Divitem was born to give control back to the community.

Vision: To become the most secure, fair, and people-powered cryptocurrency in the world.

8. How to Participate

- Mine DVM at https://divitemcrypto.com

- Become a validator

- Spread the word
